REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Au is the closest prior art. However, Au does not particularly teach the required iridium catalysts, whereas the reference, as a whole, suggests palladium complexes. Moreover, Au is silent with regard to the unexpected benefits of using iridium catalysts, namely, compounds having a complicated structure, e.g., for use as perfumes, may often be decomposed in basic reaction systems, whereas the reaction of the present invention using an iridium catalyst can be performed with less than 0.001 moles of catalyst per 1 mole of the substrate. Therefore, Au fails to motivate those of ordinary skill to the specific iridium catalysts of the present invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
